

Ather Energy: Revolutionizing the EV Two-Wheeler Industry Through Technological Innovation

Ahmedabad, Ather Energy, India's leading electric scooter manufacturer, has been at the forefront of transforming the Indian electric vehicle (EV) industry through its innovative use of technology. India's demand for EV two-wheelers has steadily risen, experiencing a remarkable 41% year-on-year growth in April 2023. This surge in acceptance towards EVs is expected to continue, making Ather's contributions significant.

Founded in 2013, Ather Energy quickly established itself as a popular choice among consumers in the EV two-wheeler segment. Their revolutionary impact began in 2018 when they introduced their first electric scooter, the Ather 450. With the motive of making rides as convenient and hassle-free as possible, Ather introduced a plethora of advanced features, including

Google Maps, touchscreen dashboard, and parking assist, making it the first smart electric scooter in India, paving the way for a new era in EVs.

Today, Ather's electric scooter is equipped with enhanced UX/UI and features such as Vector maps, AutoHold technology, guide-home lamps, theft and tow detection, anti-theft mechanism while charging, fast charging, and TPMS (Tyre Pressure Monitoring System), providing riders with a seamless and convenient riding experience. Ather's touch screen dashboard also provides onboard navigation powered by Google, which is very similar to the Google Maps experience on a smartphone. It fa-

cilitates live traffic updates, allows the rider to save locations for quick access, quick navigation to charging points, and helps find the best route through traffic. The new AtherStack 5.0, the biggest upgrade to the software so far, features a more intuitive UI and allows for easy gestures similar to those on smartphones and quick controls such as adjusting brightness or turning off incoming call notifications with a single click.

On a traditional two-wheeler, the rider has to rely on speed from the dashboard, vibrations, and engine sound to gauge how the vehicle is responding. However, with Ather's electric scooter, these interactions are different and far more convenient. The new ride screen is cleaner and more intuitive, with the information presented in a user-friendly way, allowing users to figure out any information like speed, mode, or range at just a glance.

Adobe Acrobat turns 30 as people opened over 400 bn PDFs in Acrobat in 2022

New Delhi, June 16 (IANS) It was 30 years ago that Adobe co-founder Dr John Warnock and his team invented the Portable Document Format (PDF) and Adobe Acrobat that allowed sharing of text and images digitally while preserving the original formatting of a document.

With this, they solved a fundamental problem of communicating visual material between people, computer applications and systems.

"In days of proprietary software and formats, the PDF specification was made public on day one for anyone to create, consume and process PDFs," said Abhigyan Modi, SVP of Adobe Document Cloud.

The technology in Acrobat to create PDFs was based on print pipeline that allowed any application at that time to create PDFs.

In 2008, Adobe open-

sourced PDF to the world, accelerating the paper-to-digital revolution and fundamentally changing "how we work across both our professional and personal lives." "For companies everywhere, PDF is the de facto standard business workflows, empowering organisations to communicate and memorialise their most important documents," Modi said in a blog post late on Thursday.

Last year, customers opened more than 400 billion PDFs in Acrobat products and Adobe processed over 8 billion electronic and digital signature transactions. In February this year, Adobe and Microsoft announced to bring Acrobat's PDF capabilities to more than 1.4 billion Microsoft Windows users in Microsoft Edge. Adobe continues to create the future of digital documents with AI-powered innovation.

PM urges G20 Agri Ministers to focus on collective action to achieve food security

New Delhi, June 16 (IANS) Prime Minister Narendra Modi on Friday urged Agriculture Ministers from the G20 nations to deliberate on how to undertake collective action to achieve global food security.

In his virtual address to the G20 Agriculture Ministers' meet, Modi said that ways must be found to build sustainable and inclusive food systems, focussed on marginal farmers.

"We must find ways to strengthen global fertiliser supply chains. At the same time, adopt agricultural practices for better soil health, crop health and yield. Traditional practices from different parts of the world may inspire us to develop alternatives for regenerative agriculture," he said.

The Prime Minister

emphasised on empowering farmers with innovation and digital technology.

"We must also make so-

lutions affordable for small and marginal farmers in the Global South. There is also an urgent need to reduce agricultural and food waste, and instead, invest in creating wealth from waste."

Tally Solutions eyes 2X growth, launches TallyPrime 3.0 - Simplicity ka Naya Avatar

Ahmedabad, Tally Solutions, India's leading business management software provider, today, announces the launch of TallyPrime 3.0. With this latest release, comes a completely revamped GST solution, significant improvements in the reporting capability, and better capabilities to help businesses collect outstanding dues faster. Tally Solutions hopes this release will be a steppingstone to double its revenue and take its customer base from 2.3 to 3.5 million customers in the next couple of years.

Gujarat is one of the leading industrial states in India and home to over 800 large industries and 4.5 lakh MSMEs with key business across categories including Automobiles, Pharmaceuticals, Tourism, Textiles, Gem & Jewellery, Chemicals and Agriculture. Ahmedabad alone has nearly 1.8 lakh MSMEs, thereby creating lot of opportunity for the BMS ecosystem. Digitization is one of the key pre-requisite for MSMEs to grow and scale

and grow with." With the multi-GSTIN capability, TallyPrime 3.0 users will be able to manage multiple GSTIN data in a single Tally Company giving tremendous flexibility to the customers to maintain their business data centrally using a single company with ease and efficiency. The new release ensures trailblazing speed while generating GST returns and reconciliation of GSTR 1, 2A and 3B in a much more seamless manner. It offers a digital payment request feature, enabling businesses to enhance operations and scalability. Businesses can generate and embed payment links or QR codes into their invoices or other reports. Customers can make the payment through various preferred modes like domestic and international debit and credit cards, EMIs, Pay Later, Net banking, UPI and mobile wallets thereby significantly increasing the speed of money movement and easing out cash flow problems for the business owners.

Commenting on the launch, Tejas Goenka, Managing Director, Tally Solutions said, "Since the start of the GST journey 6 years ago, we have seen many changes by the government both to simplify and tighten the compliance system. Keeping this constant change in mind, we have completely revamped our GST experience to make it tremendously flexible for businesses to remain compliant with confidence. We have also taken our reporting system and introduced the ability to create unlimited custom reports with simple to use search and save capabilities. We are committed to bringing solutions to our customers that they can truly use

Future iPhones may be scratch resistant

San Francisco, June 16 (IANS) Apple will reportedly bring scratch resistance feature to future iPhones. A patent for "Spatial Composites," which refers to integrating metal or ceramic with a chassis for scratch resistance, has recently been issued to the company, reports AppleInsider. "(Mobile) phones, watches, and tablet computers, can experience contact with various surfaces that leads to marring, or abrasion, of the surface of the device," the iPhone maker said.
